Introduction

The District Improvement Plan (DIP) has been designed to provide schools and districts with a common planning template that addresses student learning and system needs that have been identified through the schools' Comprehensive Needs Assessment.

Improvement Plan Stakeholder Involvement

Introduction

The responses should be brief, descriptive, and appropriate for the specific section. It is recommended that the responses are written offline and then transferred into the sections below.

Improvement Planning Process

Improvement Planning Process

Describe the process used to engage a variety of stakeholders in the development of the institution's improvement plan. Include information on how stakeholders were selected and informed of their roles, and how meetings were scheduled to accommodate them.

The improvement teams are open to stakeholders at every level. Representatives from all three buildings attend to give input from a variety of levels and experience. Members are selected by an open call to all school community members. This often does not produce a large amount of people. Previous members then ask parents, students, staff, and community members who are involved within the school and have a vested interest in seeing the Algonac Community School District succeed. Returning members with experience and background are asked to take leadership roles. Meetings are held at various times and locations throughout the district in order to accommodate team members and make all feel welcome.

Describe the representations from stakeholder groups that participated in the development of the improvement plan and their responsibilities in this process.

Administration, instructional staff, students, board members, community members and parents are all part of the district improvement process. Administration takes the lead with scheduling meetings and providing agendas. All members of the team have an equal voice and input.

Explain how the final improvement plan was communicated to all stakeholders, and the method and frequency in which stakeholders receive information on its progress.

The plan is finalized and posted on the district website. Paper copies are available in all school offices, as well as central office. Progress is discussed at periodic SIP/DIP meetings throughout the year.
